

# VELDOLET

After few years of research and production of high quality gas products and applications we started to produce veldolets in sizes DN 25, DN 50, DN 80 i DN 100 for weling on steel pipe

## Use:

Veldolets are used to connect pipe to the other pipe which is under pressure without stopping gas supply on main pipe.

## Tecnical characteristics:

Ø connecting pipe	veldolet size	nominal pressure
Ø 114,3x3,6	DN 25	NP 16
Ø 168,3x4,5	DN 25, DN 50	NP 16
Ø 219,1x6,3	DN 25, DN 50, DN 80	NP 16
Ø 273 x 6,3	DN 25, DN 50, DN 80 i DN 100	NP 16

Veldolets are made under procedures **EN ISO 9001:2000** and **EN ISO 14001**.

Other sizes can bee made up to 16" (NO 400),NP 16 ili NP 25/40 depends on order, and bigger sizes and pressures or ANSI on request.

**Veldolet** is made oh high quality steel part St 37,0 and is sutiable for all kinds of welding on steel gas pipeline.

Each veldolet hah its own number and certificate issued by factory.

We keep right to make technical changes
